

Royal Racers Kit Build Instructions

Block Preparation

Block Kit

The freedom is yours to carve or saw the block for aesthetics and speed.

- Sand wood using medium-grit sandpaper
- Apply sanding sealer on car body
- Paint (apply 2 to 4 coats)
- Dry completely before applying sticker(s)

Bishop Stock Car Kit, Black Trail Truck Kit, or Green Speed Wedge Kit

- Sand wood using medium-grit sandpaper
- Apply sanding sealer on car body
- Paint (apply 2 to 4 coats)
- Dry completely before applying sticker(s)

Wheel Installation

- File or sand axel pins to remove burrs
- Buff axel pins with 0000 steel wool
- Sand wheels with fine-grit sandpaper
- Insert one axel pin into each wheel hub
- Push pin into axel slot on car from the side until wheel hub is almost touching car body

(Note: Drill a 5/64" pilot hole in axel slot for an easier axel install)

Weight Installation

- Weigh car and weights together before applying weights
- Peel and stick weights to apply desired weight amount to car
